Horizon A3 Scanner

For High Speed Scanning of books
especially for the differently abled.

Features:

Camera: The scanner uses a 16 mega pixel high resolution camera which guarantees images of the best resolution and thus provides best OCR results for A3 size books.

Book placement: The scanner provides a solid plastic table top for the placement of books.

Quality: The scanner is very sturdy and the chances of it's moving or falling is negligible as it has rubber pads on the bottom which provides a strong grip and camera tower is fixed in the base.

Speed: Scanning speed of 16 A4 pages in 1 minute (including the page turning, motion sensing and capturing time)

Precision: Motion detection in the software assures that you get a clear and a blur free image every time you scan.

Saving: You can save your scanned book in PDF format and can be opened again for editing and continuation of scanning.

Software: The software has been developed in such a way that a differently abled person can scan the book independently without any difficulty.

Advantages:

Speed: Scan big size books in high resolution in quick time.

File: Your whole book gets saved in 1 PDF file.

OCR: You can use any OCR software like Lex, Readit or Fine Reader for recognition of the book.

Cost: It is highly cost effective as other scanners of such quality are very expensive.
